

ABED ALRAHMAN BARAKAT

Software Developer

● CS @ Politecnico di Milano — open to internships

SELECTED PROJECTS

- 01

Soresina Mercati2025

Stall-booking platform for the Pro Loco of Soresina, running in production: interactive map, waitlists and an admin dashboard. Booking integrity enforced at the database level (RLS), with GDPR compliance and audit logging.
Next.js · Supabase · PostgreSQL · Leaflet
- 02

Adaptive Equity Trading Lab2025

Quantitative research lab with reproducible experiments: data gates, out-of-sample validation, realistic transaction costs and Deflated Sharpe Ratio.
Python · pandas · Streamlit
- 03

Cephalometric Landmark Detector2024–25

Classical computer-vision pipeline detecting cephalometric landmarks on X-rays, with a Procrustes shape model and MRE/SDR evaluation on labeled data.
C# · EmguCV · OpenCV
- 04

Java Chess RMI2024

Desktop multiplayer chess with a rules engine built from scratch (checkmate, castling, legal moves) and game state synchronized over Java RMI.
Java · Swing · RMI
